
WORKFLOW**FORMAT**

Step 1

Send Form of Payment:

30THS(optional segment number)/(credit card code)(credit card number)**EXP**(space)(two number code for month of expiration(last two digits in year of expiration)(space)**C**(CVV)

30THS/VI1482755558239001EXP 12 08 C122

Note: The spaces after the EXP, in between the month and year, and before the C are mandatory

Note: The Credit Card Security Code (also called CCSV or CSC or CVV) is transmitted to the designated carrier by teletype message when added to the PNR, but is removed from the credit card approval SSR OTHS item during PNR end transaction. This security measure ensures the CSC is not visible nor stored in the active PNR or in PNR History once it is sent. For this reason, once you end transaction, you will not be able to verify or review the CSC code.

Use the following two letter credit card codes to ensure the transaction is successful.

AX American Express
VI Visa
IK Master Card

Step 2

Send cardholder name as shown on the card:

30THS(optional segment number)/**CH** (card holder name)

30THS/CH ALLAN JACKSON

Note: It is recommended that you only book 7M segments in one PNR. Do not combine with other carriers.
